Overall our design for a space difiner can fit good into a loun-ge area at Roskilde Festival. Its blend of scrap wood (From VELUX vindow production) and plant-dyed textiles creates a harmonious balance between sustainability and comfort. This versatile piece seamles-sly integrates into the festival environment, providing both privacy and open spaces that harmonize with the natural sur-roundings. It is not just a furniture; it's a harmonious ad-dition that enhances the festival experience while showcasing our commitment to eco-conscious design with a homely feeling.
