WHY DID WE PARTICIPATE?

To promote sustainable practices while enjoying a memorable experience with friends

HOW DID WE GET THE IDEA FOR OUR PRODUCT?

The concept for the project originated from the idea of constructing similar modules together

WHAT IS OUR PROJECT?

A sustainable solution for lounging through a modular-based concept comprising two distinct module types. The modules:

1

Enable a swift construction of seating arrangements, providing a convenient space for relaxation

2

Can be efficiently flat-packed, allowing for easy storage and transportation without occupying excessive space

3

Are constructed using sustainably sourced reclaimed wood, minimizing environmental impact and promoting the reuse of materials

THE MODIFY
