

Rehammock

We are a group of 4 students from DTU that wanted to create a cozy hangout hammock for us and our friends here at Roskilde Festival. Our names are : **Carl Gamst, Sebastian Lantz, Jonatan Eglitis Sørensen og August Vincents.**

We are all studying at DTU on our undergraduate which are design and innovation, mechanical engineering and medicine and technology

Materials and ideer

The popularity of rope climbing in Denmark has increased and therefore more climbing rope gets thrown out due to safety measures. The rope is still about 20 to 30 meters and is of high quality so we thought it would be the perfect material to use for our hammock. The wood we got was also recycled Pine tree.
