

**89%** of drivers engaged  
in at least one distracted  
driving behavior in 2020

	2010	2015	2020
 <b>Text messages*</b>	31%	36%	41%
 <b>Read email</b>	17%	23%	32%
 <b>Read social media</b>	11%	21%	29%
 <b>Access the internet</b>	17%	29%	36%

Trends continue to rise from 2010 data.

**Three out of five drivers** believe manually interacting with a phone while driving greatly increases the likelihood of an accident.

\*Respondents were asked about text messaging in general; a differentiation cannot be made between reading and responding to texts.
