PEWAUKEE — Wolter Power Systems is committed to helping educate and train those interested in working in the trades, says General Manager Dan Peters.

Backing up that commitment is the company's recent \$15,000 donation to Waukesha County Technical College. New equipment, including an industrial Generac diesel generator and two air-cooled Generac engines, was provided. Wolter Power is also contributing technicians and trainers to assist with classroom activities and learning workshops, along with product and theory training materials that may be used in the classroom.

"We geared the donation to support the class curriculum/development around the Diesel Equipment Technology program," said Peters. "With further discussions and meetings with Mr. (Mike) Shiels (dean of School of Applied Technologies), we found interest and common ground with the equipment donated and the

synergies with other programs within the applied technologies area."

Shiels says donations of modern, cutting-edge equipment strengthens the

School of Applied Technologies' programs and gives students a technical advantage.

"This is the very equipment students will work on

in industry, and to have exposure to this kind of technology before entering the workforce is a great benefit to them," said Shiels.
