

# Curved Dual Display

## Driver Information Solution

### Features:

- Cold forming glass lens enables a range of complex multi-curvature design studio requirements  
Cluster: R750 concave  
Center area: R250 convex  
CID: R1200 concave
- Visteon "bond then bend" structural manufacturing process
- Leverages the Visteon robotized bonding system

### Benefits:

- Design differentiation enabled by multi-curvature displays behind a seamless glass lens
- Cold forming glass lens offers the lowest cost solution for curved displays
- Automotive-designed monolithic structure integrating open cell FoG LCD and carrier-integrated backlight
- Structural and styling elements in single integrated housing
