Say 'n Serve – Personal Assistant

Embedded Voice Recognition Solution

Features:

- Visteon AI-based speech recognition and natural language understanding engine
- On board and embedded in infotainment or SmartCore™
- Intelligent arbitration across multiple cloud-based voice assistant solutions
- Vehicle-specific noise reduction
- Supports OEM customization and branding

Benefits:

- Low-cost NLU solution compared with traditional approach
- Real-time recognition across multiple languages
- Customizable accent and wake word
- Addresses automotive use cases not addressed by cloud assistants
- Arbitration enables intelligent integration with cloud-based assistants
- Small embedded footprint allows for integration on a range of hardware platforms
